PROFESSIONAL SUMMARY

Detail-oriented Software Engineer with 3+ years of experience in designing, developing, and deploying scalable backend architectures and distributed systems. Proficient in Python, Go, and cloud-native technologies (AWS, Kubernetes). Proven track record of optimizing database queries to reduce latency by 40% and leading cross-functional teams to deliver high-impact enterprise applications on strict deadlines.

EDUCATION

University of Technology

Bachelor of Science in Computer Science

San Francisco, CA

Aug 2018 – May 2022

EXPERIENCE

TechNova Solutions

Backend Software Engineer

New York, NY

June 2022 – Present

- Architected and deployed a microservices-based payment processing API using Go and gRPC, handling over 10,000 transactions per second with 99.99% uptime.
- Spearheaded the migration of legacy monolithic databases to distributed PostgreSQL clusters, improving read/write query performance by 45%.
- Implemented automated CI/CD pipelines using GitHub Actions and Docker, reducing deployment times from 45 minutes to under 5 minutes.

CloudSync Inc.

Software Engineering Intern

Austin, TX

May 2021 – Aug 2021

- Developed internal dashboard tools using React and Node.js to monitor server health across 500+ AWS EC2 instances.
- Wrote comprehensive unit and integration tests using Jest, increasing overall code coverage from 60% to 85%.

PROJECTS

Distributed File Storage System

Lead Developer

Go, Raft Consensus, Docker

Jan 2023 – March 2023

- Engineered a fault-tolerant distributed file system implementing the Raft consensus algorithm to handle node failures gracefully.
- Containerized the application environment to simulate network partitions and evaluate system resilience under high stress.

Real-Time Analytics Engine

Open Source Contributor

Python, Apache Kafka, Redis

Nov 2022

- Built a real-time data ingestion pipeline utilizing Apache Kafka capable of processing 1M+ events daily.
- Utilized Redis for in-memory caching to provide sub-millisecond data retrieval for the frontend visualization layer.

TECHNICAL SKILLS

Languages: Python, Go, Java, C++, JavaScript/TypeScript, SQL

Frameworks & Tools: React, Node.js, Django, FastAPI, Docker, Kubernetes, Git

Cloud & Databases: AWS (S3, EC2, Lambda), PostgreSQL, MongoDB, Redis, Apache Kafka
