

Morgan Riley

Lead Data Scientist & Machine Learning Engineer

morgan.riley@example.com | +1 (555) 456-7890 | [linkedin.com/in/morganriley](#) | [github.com/morganriley](#)

Professional Summary

Strategic Data Scientist with over 6 years of experience transforming complex datasets into actionable business intelligence and scalable machine learning pipelines. Expertise in Natural Language Processing (NLP), deep learning frameworks, and cloud-based deployments. Proven track record of leading cross-functional teams to build predictive models that drive user engagement and optimize revenue streams by up to 22%.

Professional Experience

2021 – Present
San Francisco, CA

Lead Machine Learning Engineer

Synergy Analytics

- Architected an end-to-end recommendation engine utilizing PyTorch and AWS SageMaker, increasing customer click-through rates by 18% within the first quarter.
- Directed a team of 4 data scientists in developing a sentiment analysis pipeline for customer reviews using fine-tuned BERT models, reducing manual support ticket routing by 40%.
- Established comprehensive CI/CD data pipelines using Apache Airflow and Docker to ensure daily automated retraining of production models with zero downtime.

2018 – 2021
Austin, TX

Data Scientist

Quantum Retail Solutions

- Designed dynamic pricing algorithms using historical sales data and competitor API scraping, yielding a 12% year-over-year revenue boost.
- Built interactive management dashboards using Python, Dash, and PostgreSQL to visualize real-time inventory anomalies across 150+ global warehouses.
- Conducted rigorous A/B testing on new checkout workflows, utilizing statistical significance testing (ANOVA, T-tests) to confirm a \$1.5M annual uplift in conversion value.

2017 – 2018
Boston, MA

Data Analyst Intern

FinTech Innovations Group

- Automated weekly financial reporting workflows by replacing Excel macros with scalable Python (Pandas/NumPy) scripts, saving the finance team 15 hours per week.
- Cleansed and aggregated over 5 million rows of unstructured transactional data to assist in the detection of fraudulent accounts.

Key Projects

2023
Open Source

NeuroVision: Image Segmentation Tool

Creator & Maintainer

- Developed an open-source medical imaging tool that utilizes Convolutional Neural Networks (U-Net) to automatically segment MRI scans with 94% accuracy.
- Optimized the inference script to run seamlessly on consumer-grade GPUs, garnering 500+ stars on GitHub.

Education

2015 – 2017
Boston, MA

Master of Science in Data Science

Boston University

2011 – 2015
Chicago, IL

Bachelor of Science in Applied Mathematics

University of Illinois

Technical Skills

Languages	Python, SQL, R, Scala, C++, JavaScript
ML & Big Data	PyTorch, TensorFlow, Scikit-learn, Pandas, Spark, Hadoop, Kafka
DevOps & Cloud	AWS (SageMaker, EC2, S3), GCP, Docker, Kubernetes, Git, Apache Airflow
