

Jordan Smith

Senior Full-Stack Engineer | Cloud Architecture Specialist

jordan.smith@example.com | +1 (555) 987-6543 | github.com/jordansmith

Professional Summary

Innovative and adaptable Senior Full-Stack Engineer with 5+ years of experience architecting enterprise-grade applications. Adept at bridging the gap between high-performance backend systems and intuitive frontend user interfaces. Passionate about cloud-native optimization, mentor-ship, and driving agile methodologies to deliver scalable, highly available SaaS products to market efficiently.

Experience

Senior Software Engineer

Jan 2022 – Present

Apex Technologies Inc.

- Led a team of 6 engineers to architect and launch a scalable SaaS platform, generating \$2M+ in ARR within the first year of release.
- Optimized monolithic legacy codebases by transitioning to event-driven microservices, reducing server infrastructure costs by 30%.
- Instituted strict code review policies and automated testing standards, reducing critical production bugs by 55%.

Full-Stack Developer

Aug 2019 – Dec 2021

Creative Web Solutions

- Developed interactive, high-traffic e-commerce storefronts using React.js and Redux, improving user retention rates by 25%.
- Integrated secure, third-party payment gateways (Stripe, PayPal) and built custom admin dashboards using Node.js and Express.

Software Intern

May 2018 – Aug 2018

DataMinds Corp

- Wrote Python scripts to automate daily data scraping tasks, saving the data analysis team over 15 hours of manual work weekly.

Key Projects

OpenStream Video Platform

React, WebRTC, Node.js

- Engineered a low-latency, peer-to-peer video conferencing application utilizing WebRTC and custom STUN/TURN servers to support up to 50 concurrent users per room.

Predictive Inventory ML Model

Python, TensorFlow

- Trained and deployed a machine learning model to forecast warehouse inventory needs based on historical sales data, achieving an 88% prediction accuracy.

Education

State University

M.S., Computer Science

Graduated May 2019

State University

B.S., Software Engineering

Graduated May 2017

Technical Skills

Backend Languages:

Java, Python, C#, Go

Frontend Technologies:

React, Vue.js, TypeScript, Tailwind CSS

Infrastructure & DevOps:

Docker, Kubernetes, AWS (EKS, S3, RDS), Terraform, CI/CD

Databases:

PostgreSQL, MongoDB, Redis

Certifications

AWS Certified Solutions Architect

Amazon Web Services, 2023

Certified Kubernetes Administrator (CKA)

Cloud Native Computing Foundation, 2022

Awards

1st Place - Global Hackathon

TechCrunch Disrupt 2021

Developed an AI-driven accessibility tool for visually impaired web users.
